Introduction

Admin Dashboard provides several features to an administrator of this application. For this documentation, the flow and the design of the Analytics feature of Admin Dashboard will be documented.

Accessibility

Only system administrators are authorized to access this feature of PointMap. In the Admin Dashboard page, administrators may view the analytics by clicking on the “Analytics” section located on the top left corner of the browser.

Functionality

Admin Dashboard - Analytics provides the following insights to the user

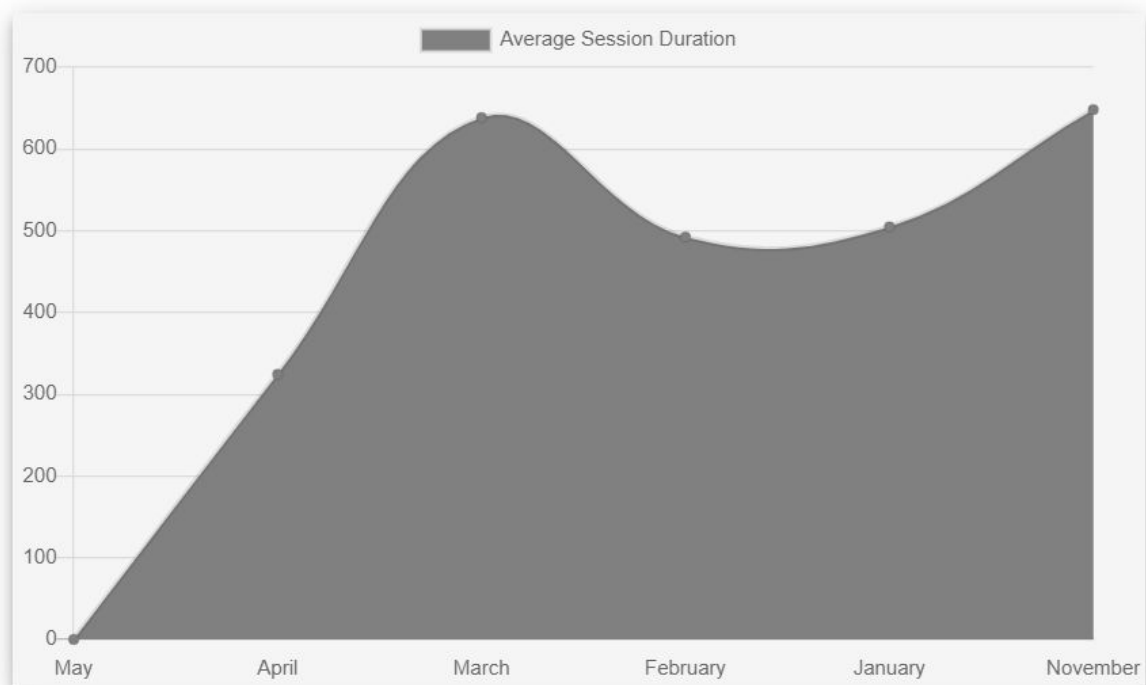

- Average Session Duration - Bar Graph
- Average Session Duration - Line Graph
- Successful Logins - Bar Graph
- Login Attempts - Bar Graph
- Top 5 Web Pages by Time Spent - Bar Graph
- Top 5 Features by Page Visits - Bar Graph
- Total Logins against Registered Users - Line Graph

Average Session Duration - Bar Graph

The bar graph depicts the total amount of time in seconds that the Average User spends on our website per month.

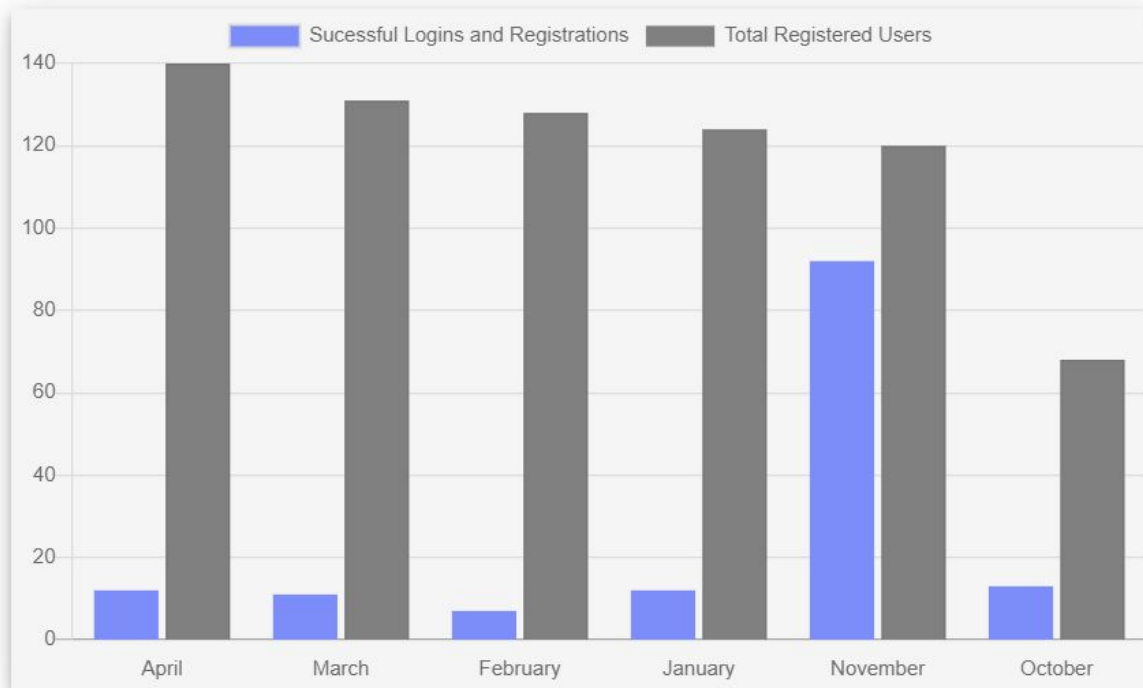

Average Session Duration - Line Graph

Average Session Duration

The Line Graph is shows the same information as the Average Session Duration - Bar Graph, just in a different format

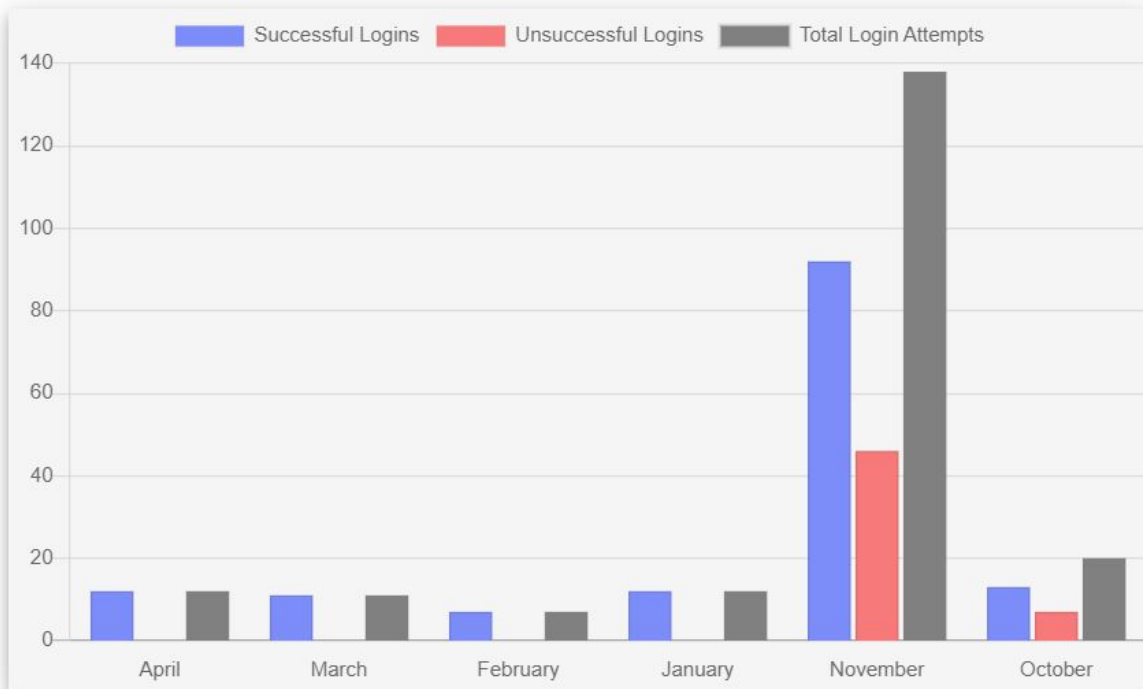

Successful Logins - Bar Graph

Successful Logins

Successful Logins show the number of successful logins against the total number of registered users for each month.

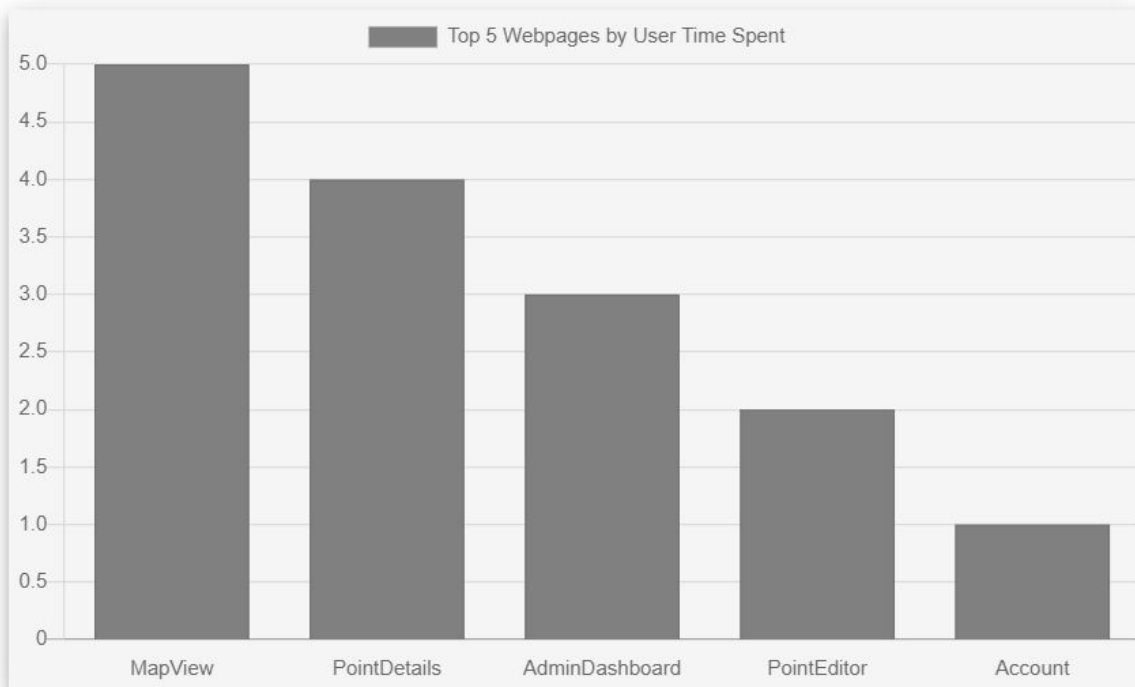

Login Attempts - Bar Graph

Login Attempts

Login Attempts show the number of successful login attempts, unsuccessful login attempts, and the total number of login attempts for each month.

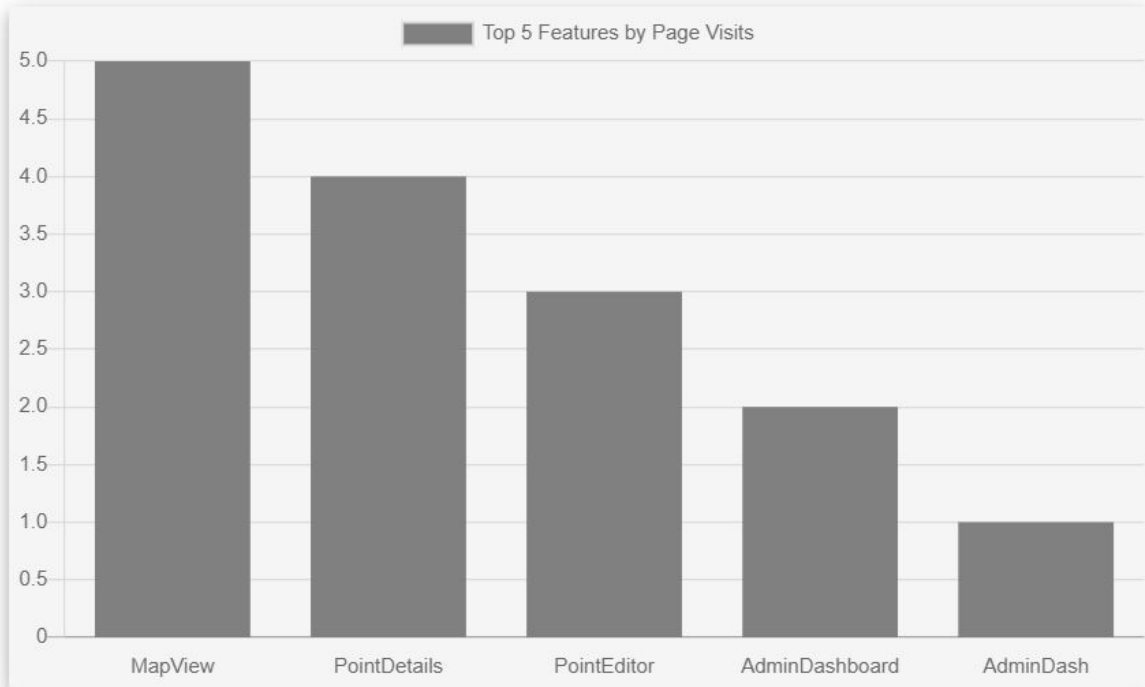

Top 5 Pages by Time Spent

Top 5 Webpages by User Time Spent

The above graph lists the top 5 web pages by total user time spent on each page of the application.

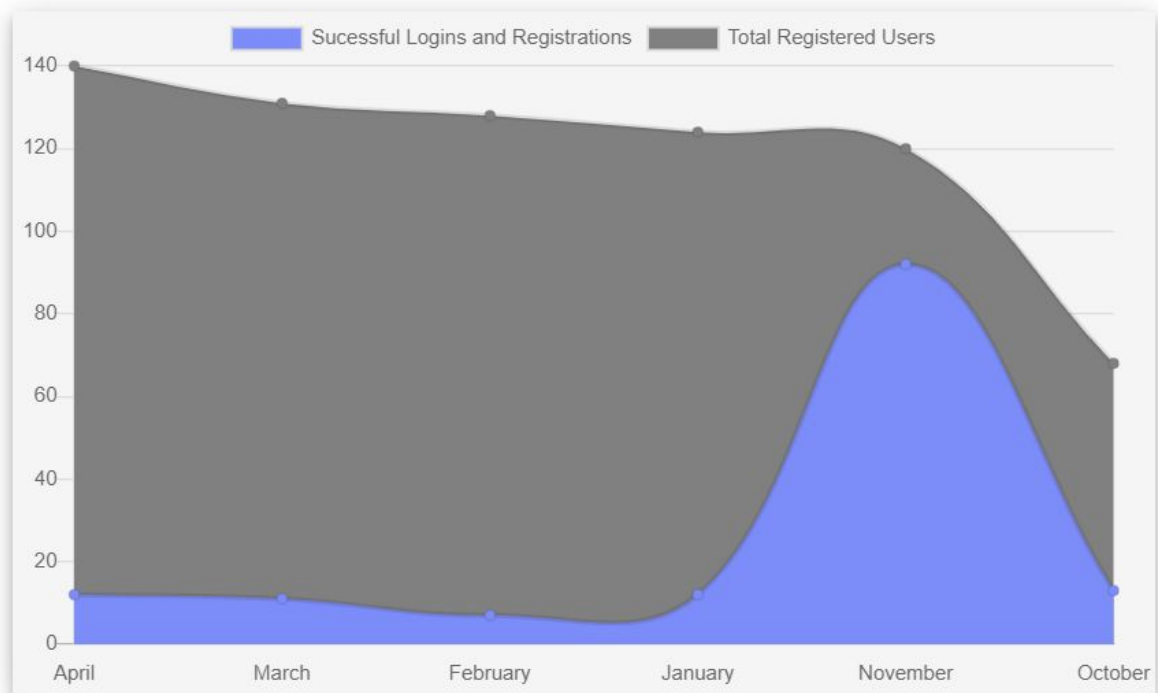

Top 5 Pages by User Visits

Top 5 Features by Page Visits

The following documents depicts the top feature by number of times users has visited the page per session.

Total Login vs Registered Users

Total Logins

The final graph shows the total number of logins beneath the total amount of registered users.
